## Overview

Economic issues, such as unemployment, inequality, prosperity, and crises, permeate all facets of life. They fill news reports, employers' statements, and even popular culture. At the same time, economics—the scientific endeavour of explaining such issues—is often considered impenetrable. This course shows that it does not have to be that way. It portrays economies from around the world and sketches their developments over time. It introduces labour and business views of the economy and their respective policy implications. Finally, it deals with the question of whether workers, rather than being employed by private or public enterprises, could manage their workplaces on their own behalves. News sources and songs, which broaden the perspective on workers and the economy beyond scholarly work, complement the textbooks for this course.

## Outline

- Unit 1: Workers and the Economy
